

Students in our Biology classes are entering the America's Greenest School contest which is a national competition. Students are creating videos, songs, art work, photos, collages, and essays to tell how Seton is becoming eco-friendly. All students will be submitting their projects on line where they will compete with submissions from all over the country to be a top 10 finalist. Then all of America will be invited to vote online for the ultimate champion.

This project allows us to bring an awareness about the importance of the environment to our school community and fits right into our curriculum. Our involvement in this contest will continue our efforts to "Go Green" and the \$20,000 prize dedicated to a green makeover will allow us to do bigger projects that will make our building eco-friendly.

We are also asking for everyone in the Seton Community to place all of their paper waste into our yellow and green Abitibi dumpsters by the parking structure. We accept ALL collapsed cardboard (corrugated and non-corrugated), All paper products and packaging, cereal boxes, junk mail, shredded paper, paper and cardboard tubes, newspaper magazines, catalogues. We Really Need Everyone to contribute!
